

PNEUMOCOCCAL DISEASE

Pneumococcal disease is caused by bacteria that can result in serious complications such as meningitis, pneumonia and blood infections.

ADULTS 65 AND OLDER AND ADULTS LIVING WITH A CHRONIC ILLNESS ARE AMONG THOSE AT HIGHEST RISK.

Getting the pneumococcal vaccine is important for the health of adults 65+.

Talk to your family doctor, nurse, pharmacist, or local public health office about getting immunized against pneumococcal disease.
