

I'll protect
my baby.

I'll get immunized against influenza.

Even if you're healthy, if you live with or care for people at high risk for severe complications from **influenza**, you should get immunized.

Groups at high risk include infants, pregnant women, kids and adults with chronic medical conditions*, and adults 65 and older.

Talk to your health care provider about the risks and differences between seasonal influenza and pandemic H1N1 influenza.

Funding in part provided by the Public Health Agency of Canada

Don't get influenza. Don't spread influenza.

Get immunized.

The reasons are all around you
