

**I work in
health care.**

I'll get immunized against influenza.

Even if you are healthy and practise healthy behaviours, you may be infected with influenza without knowing it.

That means you could pass the virus to your co-workers, people in your care, and your family.

Don't get influenza. Don't spread influenza.

Get immunized.

The reasons are all around you

Canadian Coalition
for Immunization Awareness
& Promotion (CCIAP)
