PNEUMOCOCCAL DISEASE

Pneumococcal disease is caused by bacteria that can result in serious complications, such as meningitis, pneumonia and blood infections.

ADULTS 65 AND OLDER AND ADULTS LIVING WITH A CHRONIC ILLNESS ARE AMONG THOSE AT HIGHEST RISK.

Adapted from CDC resource.

Immunize Immunisation *Canada*
immunize.ca

Talk to your family doctor, nurse, pharmacist, or local public health office about getting immunized against pneumococcal disease.
